

# v6ops Deployment Questionnaire

# What is the v6ops WG?

*The IPv6 Operations Working Group (v6ops) develops guidelines for the operation of a shared IPv4/IPv6 Internet and provides operational guidance on how to deploy IPv6 into existing IPv4-only networks, as well as into new network installations.*

# What is the v6ops WG?

*[...]*

- 1. Solicit input from network operators and users to identify operational issues with the IPv4/IPv6 Internet, and determine solutions or workarounds to those issues. These issues will be documented in Informational or BCP RFCs, or in Internet-Drafts.*

# Service Provider Scenarios

- <http://tools.ietf.org/html/draft-carpenter-v6ops-isp-scenarios>

*This document describes scenarios that are emerging among Internet Service Providers for the deployment of IPv6. They are based on practical experience so far, as well as current plans and requirements, but they are not intended as binding recommendations.*

# The authors need your input!

- What are your plans for IPv4?
- What are your plans for IPv6?
- What hurdles have you come across?
- What would help?

# Fill out the questionnaire (please).

- Just a plain text file, not another SurveyMonkey survey!

*<http://www.cs.auckland.ac.nz/~brian/ISP-v6-QQ.html>*

- Email the result to [brian.e.carpenter\(at\)gmail.com](mailto:brian.e.carpenter@gmail.com)
- Replies appreciated by early February (i.e. next couple of weeks) to reach the I-D deadlines for the next IETF meeting.
- Catch me today and I'll email the URL to you, but I'll also send a pointer to the list.
