# xangati

**UKNOF17**

vmware
technology alliance
**PARTNER**
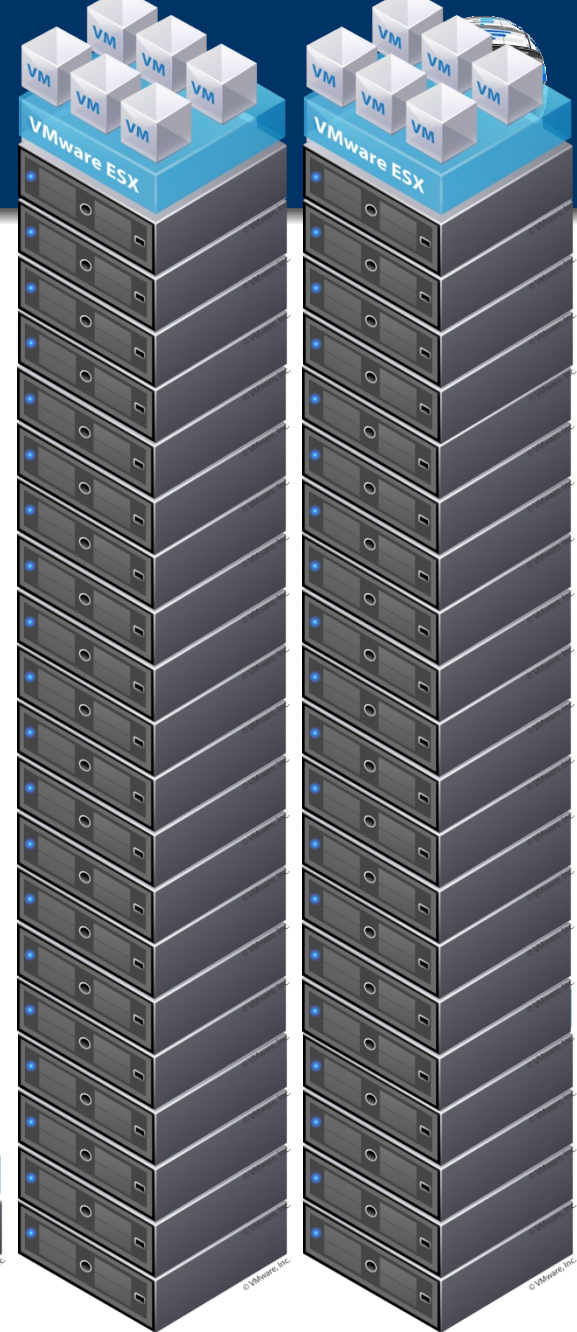

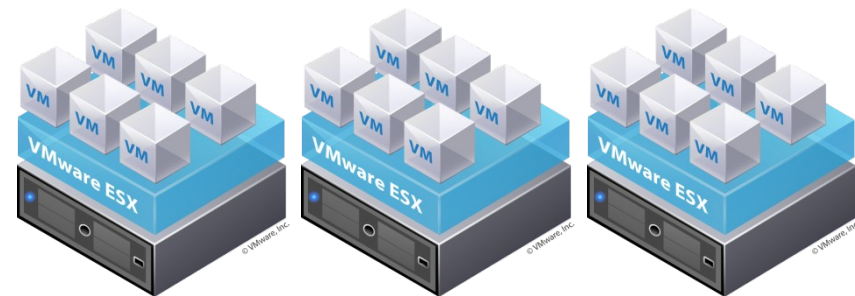

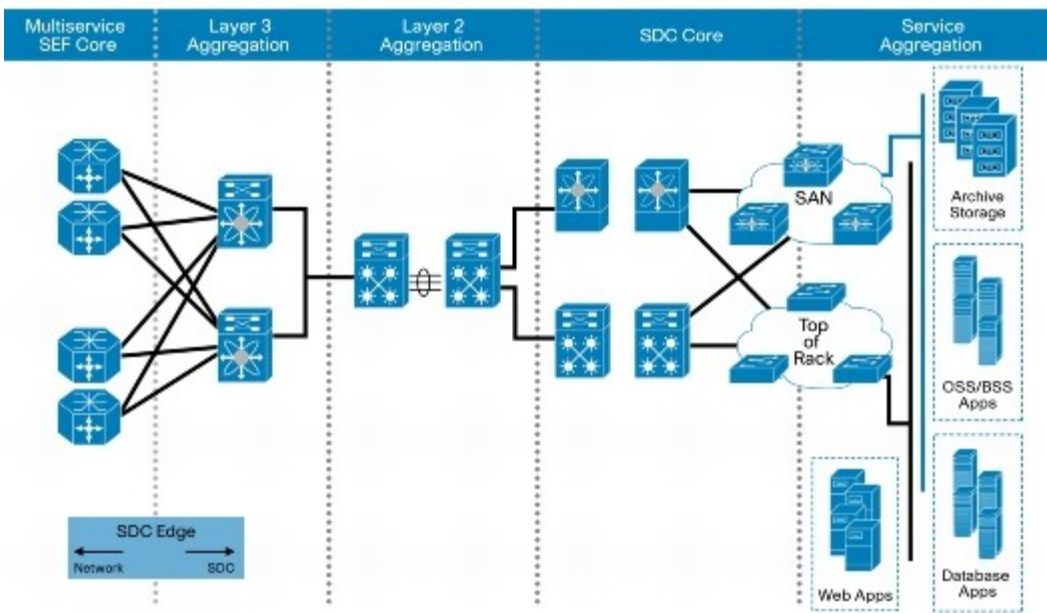

VMWare deployments the "way to go" in many organisations and for very good reason:
        more efficient use of hardware
        cost savings – power, rack space, cost of adding more process, speed of adding more process

# Moving from Physical to Virtual - P2V

# The issue

Network Administrators lose visibility of activity between VM hosts in the virtual world
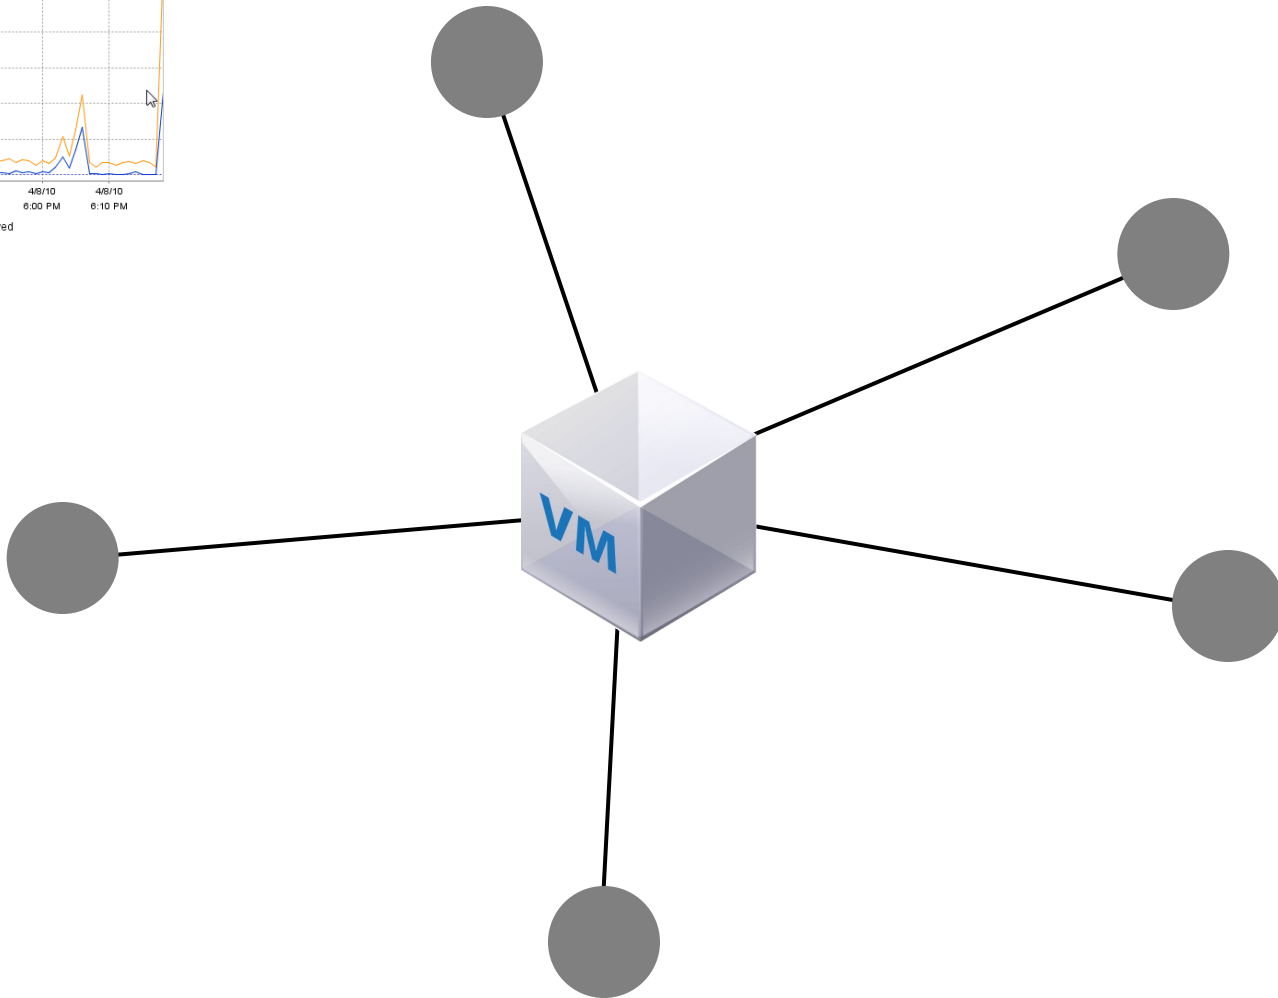

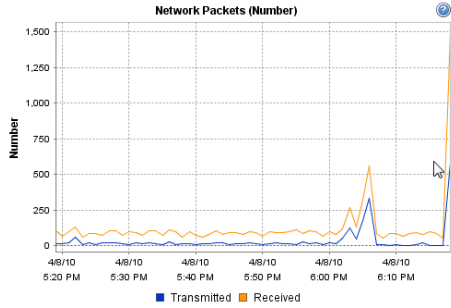

# Silo Approaches Breed Conflict

## Network Team:
"everything is ok – virtualization must be the problem"

## Virtualization Team:
"I can't prove it – but it surely can't be virtualization …"

# VMWare's limited view
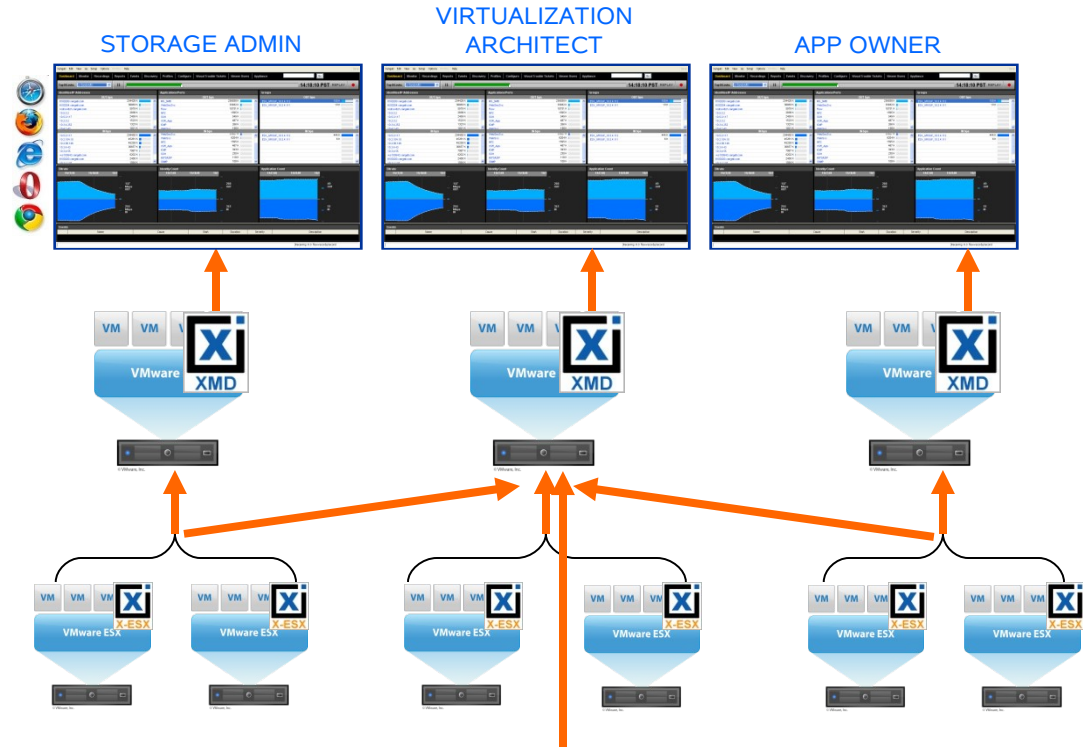

# Ultralight Deployment
